Juicy Juice® Brand certifies that it is American made and 100% finished product is made in America.

The Buy American provision of the National School Lunch Program requires school food authorities (SFAs) to purchase, to the maximum extent practicable, “domestic commodity or product.”

There are exceptions to the Buy American provision which allow for purchases of products not meeting the “domestic” standard, including when *“the product is not produced or manufactured in the U.S. in sufficient and reasonable available quantities of a satisfactory quality.”* (Buy American provision document, SP 38-2017, June 30, 2017).

Juicy Juice® products comply with the Buy American provision pursuant to this exception. All Juicy Juice® products are manufactured in the United States; however, less than 51% of the agricultural commodities used in those juices are produced in the United States. Juicy Juice® Brand uses apple juice concentrate as the main ingredient in our juice products. Most U.S. apple supply is used to produce food, not juice concentrate. The U.S. juice category is so large, and the demand for concentrate high, that the Juicy Juice® Brand, (along with most other juice manufacturers), is not able to source all its concentrate needs domestically, or produce sufficient quantities of product containing substantial U.S. ingredients. Therefore, Apple Juicy Juice® will be coded with the country of origin of the Apple Juice Concentrate. Countries may include; United States, Argentina, Chile, China, Brazil, Italy, Poland or Turkey.
